- 1-1/2 cups boiling water
- 2 pkg. (3 oz. each) JELL-O Gelatin, any red flavor
- Ice cubes
- 1 cup cold water
- 1 pkg. (12 oz.) prepared pound cake, cut into 10 slices
- 1-1/3 cups blueberries, divided

Make It:

SLICE 1 cup strawberries; cut remaining strawberries in half.

ADD boiling water to gelatin mixes in large bowl; stir 2 min. until completely dissolved. Add enough ice to cold water to measure 2 cups. Add to gelatin; stir until ice is melted. Refrigerate 5 min. or until slightly thickened. Meanwhile, cover bottom of a 13 X 9-inch dish with cake slices.

Fun Money Facts

One bill weighs 1 gram and 454 bills equal one pound. This means if you have \$1 million in singles, it would weigh over 1 ton! A suitcase of \$1 million in \$100 bills weighs over 20 pounds!

The typical lifespan of a \$1 bill is just 18 months. While the lifespan of a \$100 bill is close to 9 years. And you thought dogs aged fast! Here is a total breakdown: \$1 bill: 18 months; \$5 bill: 2 years; \$10 bill: 3 years; \$20 bill: 4 years; \$50 bill: 9 years; \$100 bill: 9 years; Coins: 30 years.

Money is recycled when worn out. Worn out coins are melted down and used to make new coins. Worn out bills are shredded, recycled, and then made into roof shingles or fireplace logs.

A penny costs more to manufacture than it is worth. It costs the government roughly \$0.02 to make a single penny.

Loose change really does add up. In 2015 the TSA collected \$765,759.15 in loose change at airport security checkpoints across the country.

The ink used to print money is high tech. So high tech that it has trackable, magnetic, and color changing properties.
